*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11 and 19-25, drawn to a capsule endoscope, classified in class 600, subclass 109.
  - II. Claims 12-18, drawn to a method for forming a capsule endoscope, classified in class 438, subclass 459.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed (and specifically the substrate) can be made by another and materially different process such as injection/compression molding.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. To evidence the requirement of “serious burden”, it is noted that the application of such requirement affects both search and examination of the claimed patentably distinct inventions. Therefore, as much as the search for the distinct inventions might overlap to a certain extent, there still exists the burden of separate analysis of the prior art references for each distinct invention, as well as a separate written analysis in the Office Action.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
